ANTIBODI DRUG CONJUGATES

E-Learning
ADCs in Breast Cancer Treatment

supported by

E-Learning ADCs in Breast Cancer Treatment

E-Learning Content

The ABCSG E-Learning on ADCs in Breast Cancer Treatment is a joint project of ABCSG, Daiichi Sankyo and AstraZeneca. In this 1.5 hour on demand continuing education format, which will be available in ABCSG Members Area from Mid July 2021 on, you will learn about latest treatment options regarding Antibody Drug Conjugates (ADCs) and will also get insights into drug developments in this field.

Lecture 1

Next-generation antibody–drug conjugates (ADCs): Mode of action & current developments

Rodney Berzoini Smith, Head of Medical Affairs Europe at Daiichi Sankyo

Lecture 2

ADCs in the treatment of advanced breast cancer

ABCSG Expert Marija Balic

Lecture 3

HER2+ breast cancer: current standards and future perspectives

ABCSG Expert Georg Pfeiler

Discussion

Virtual Panel Discussion with all speakers, ABCSG board member Christian Singer and ABCSG President Michael Gnant

Quiz

Members of the Austria Medical Chamber can acquire 2 DFP points for internal medicine if they pass the quiz after the lecture. If the quiz is passed, and ABCSG gets an automated message and will post the DFP points to the account.

Online portal

Access the E-Learning via ABCSG Members Area (HCPs access only). If you are interested and not registered yet, register abcs.org/registration. Otherwise, please log in via abcs.org/members-only.
