

MEDIZINISCHE UNIVERSITÄT GRAZ - WER WIR SIND

An der Medizinischen Universität Graz steht der Mensch in seiner Gesamtheit im Mittelpunkt. Handlungsleitend für unser Tun ist es, die uns anvertrauten Menschen mit ganzem Einsatz auf höchstem Niveau zu betreuen, zu begleiten und in ihrer Entwicklung zu fördern. "Pioneering Minds - Research and Education for Patients' Health and Well-being" ist es, was uns antreibt.

Werden Sie Teil eines außergewöhnlichen Teams - werden Sie ein Pioneering Mind!

Tenure Track Professor of Translational Breast Cancer Research

Department of Internal Medicine

Division of Oncology

Full-time position (100%); initially limited to 6 years, becoming a tenured position when the qualification agreement is met

We are looking for an excellent specialist and researcher to expand our internationally recognized scientific and research agenda in the field of translational breast cancer research.

The successful candidate should be a proven expert in the field of translational breast cancer research and represent it in research, teaching and patient care.

The Department of Internal Medicine takes a holistic healthcare approach according to the biopsychosocial model when treating its patients. The successful candidate should be willing to engage in interdisciplinary and interprofessional cooperation between different specialist areas as well as with occupational groups that provide care and technical medical services.

The initial appointment is limited to six years with a qualification agreement (tenure track model pursuant to § 99 para. 5 and 6 of the Universities Act). The career advancement goal is to transfer to a tenured position as an associate professor. If the candidate demonstrates outstanding and remarkable achievements, the qualification agreement may be fulfilled more quickly.

Core duties and responsibilities

- Groundbreaking scientific work in the field of translational breast cancer research
- Further development of the University Comprehensive Cancer Center (CCC) especially Subcenter Breast
- Designing, acquiring, implementing and managing funded research projects
- Establishing and leading a nationally and internationally recognized multidisciplinary team and promoting junior researchers and clinicians
- Cooperating on research that exploits the existing strengths of the division or department and other disciplines at the Medical University of Graz
- Providing inpatient and outpatient care according to modern biopsychosocial and personalized medicine and being on call at night and on weekends
- Teaching undergraduate and graduate courses in medicine, supervising diploma and PhD students and mentoring and promoting junior researchers

- Establishing and maintaining networks through local, national and international research collaborations
- Writing and publishing high-quality scientific papers
- Organizing and participating in conferences in the academic field
- Participating in effective public relations work in the research area (public lectures, media, etc.)

Successful candidates must have the following qualifications and skills:

- Degree in medicine and a relevant doctoral degree
- Authorization to practice as a specialist in internal medicine and hematology and medical oncology or the equivalent qualification from another country
- Outstanding research expertise in the field of translational breast cancer research and proven track record of continuous and high-quality publications on breast cancer
- Proven track record of acquiring (inter)national third-party funding
- Extensive experience in caring for patients with breast cancer
- Experience in setting up and directing a scientific working group
- Experience in university teaching and/or (co)supervising doctoral students and/or training postdoctoral scholars
- Proven track record of international networking and lecturing
- Stay abroad of several months at a different research institution than the one where he/she received specialist training
- C1 level of proficiency in both spoken and written German and English (Common European Framework of Reference for Languages)

The ideal candidate has the following profile:

- Visionary, dynamic and motivated
- Organizational skills, team orientation and ability to cooperate
- Great willingness to engage in interdisciplinary and interprofessional cooperation
- Empathy and good communicative and social skills
- Management and leadership skills and experience
